

# GENIE® gas cylinder regulator.

## Product information.

### 300 bar working pressure

GENIE® regulators have been designed and manufactured to meet requirements of standard EN ISO 2503. GENIE® regulators are approved for inlet pressure of 300 bar. Regulators approved for inlet pressures lower than 300 bar are not compatible with GENIE® cylinders. Any attempt to either modify or forcibly connect the regulator to the cylinder is very dangerous. Therefore the GENIE® regulators are the safest option for your GENIE® cylinder.

### Stable pressure

GENIE® cylinder regulators are delivered with flow - or pressure manometer. Since the regulators are adapted for the digital GENIE® cylinder, therefore there is no need for content gauge. The Linde GENIE® PRO regulators have constant outlet pressure even with variation in cylinder pressure.

### Optimized safety functions

GENIE® regulators are smaller than normal regulators to ensure they fit within the handle footprint for optimized safety. The rugged brass body comes with a pressure relief valve for added safety.

### Unique design

The regulators have been designed specifically for use with GENIE® cylinders featuring the Digital Intelligence Unit (DIU).

Type of gas	Regulator and gas identification ring colour	Inlet pressure	Outlet pressure/flow	Inlet connection	Outlet connection	Article number
<b>GENIE® standard regulators</b>						
Argon/MISON®	green	300 bar	0-30 l/min	W 30x2	G 3/8"	331273
Nitrogen	black	300 bar	0-10 bar	W 30x2	G 3/8"	331275
Nitrogen	black	300 bar	0-50 bar	W 30x2	G 3/8"	331276
<b>Linde GENIE® PRO regulators</b>						
Argon/MISON®	green	300 bar	0-10 bar	W 30x2	G 3/8"	333914
Nitrogen	black	300 bar	200 bar	W 30x2	G 3/8"	333915

GENIE® gas  
cylinder accessories

**GENIE® cylinder extension handle**  
The extension handle is designed for use in conjunction with the GENIE® cylinder wheel unit. The extension simply clips onto the handle area of the GENIE® cylinder and can then be extended to the length that is most comfortable for you.

Article number: 331283

**GENIE® cylinder wheel unit**  
The cylinder wheel unit fits any size GENIE® cylinder. The cylinder simply slips into the wheel unit and is locked in place using two diametrically opposed claw clamps.

Article number: 331282

**Regulator Linde GENIE® PRO**
